(TC to FA)
FRONT propellor drive
shaft from transfer case
for all 4x4 SUV's, trucks.
(In some models the shaft is
mounted on the opposite
side of the vehicle.)

(TC to RA)
REAR propellor drive
shaft from transmission
to REAR axle for all
4x4 SUV's, trucks.

For Illustrative Purposes Only May Not Resemble Actual Parts

HOW TO USE THE CATALOG

Year	Application	Length	Code	Type	Part
AM GENERAL					
HUMMER					
2010-06	FRONT H3	23 5/8"	W	A29	9492
(3)	(4)	(5)	(6)	(7)	(8)

- (1) Locate Manufacturer - Listed Alphabetically.
Example: GMC

(2) Locate Model - Listed Alphabetically.
Example: Hummer

(3) Locate Year. Example: 2010-06

(4) Locate Application. Example: FRONT H3
- (5) Confirm Overall Length

(6) Code - How to Measure Shaft (See Footnote Codes on Bottom of Each Page Spread)

(7) Type of Shaft (See Footnote Codes on Bottom of Each Page Spread)

(8) Locate Part Number. Example: 14118-6298

Whenever necessary, footnotes and illustrations are used to clarify catalog listings. Each application listing will show a TYPE number to refer to in the application. The photos can be found on pages VI through VIII. Your shaft should closely match the photo shown. If not, please contact the technical information department for assistance.

GENERAL INFORMATION

Driveshaft assemblies are remanufactured, not rebuilt, to ensure a long and trouble free service life. Only those components that meet the original OEM specifications are reused. All other components are replaced with new or OEM equivalent components. Driveshafts are re-assembled with new universal joints and CV centering kits with grease fitting where ever possible. They are then straightened and balanced at operating speeds for a smooth and long life. Remember, grease is the life of the shaft and it is important to properly lubricate the driveshaft upon installation. Instructions are supplied with the driveshaft and are available from Pat's Driveline.

MEASURING A DRIVE SHAFT

The length of a driveshaft can be determined by different methods. To properly measure a driveshaft there are a few terms that are used.

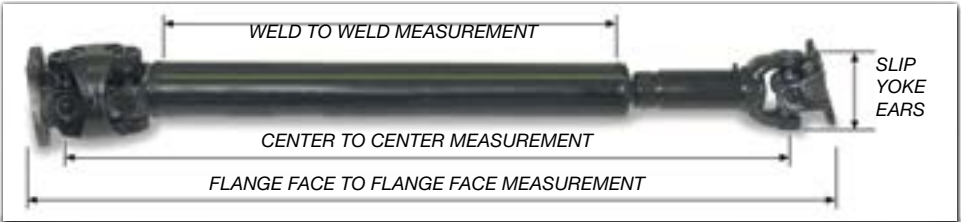

Flange face - the flat surface on a flat flange. On the output companion flange, it is measured from half way up the side of the flange face.

Center of U-joint - the centerline of the round bearing of the universal joint. On the vehicle, this is the outer edge of the end yoke where the attaching hardware would contact.

Collapsed position - this is where the length compensation of the driveshaft has been compressed prior to the measurements being taken.

Running position - this is the driveshaft length when installed in the vehicle at typical ride height.

In addition to length measurements, you may need to measure the size of the universal joint to properly identify the series of driveshaft. This is generally done by measuring the diameter of the u-joint bearing and the width across the outside of the yoke ears or u-joint Bearings.

Type

Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
Tube length only. Measure centerline of weld to centerline of opposite weld.
See pages V-VII

Type

Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
Tube length only. Measure centerline of weld to centerline of opposite weld.
See pages V-VII

CODES:

B

C

W

Type

Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
Tube length only. Measure centerline of weld to centerline of opposite weld.
See pages V-VII

C

W

Type

Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed. Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint. Tube length only. Measure centerline of weld to centerline of opposite weld. See pages V-VII

CODES:

B Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
C Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
W Tube length only. Measure centerline of weld to centerline of opposite weld.
Type See pages V-VII

Type

Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
Tube length only. Measure centerline of weld to centerline of opposite weld.
See pages V-VII

CODES:
B Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
C Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
W Tube length only. Measure centerline of weld to centerline of opposite weld.
Type See pages V-VII

CODES:
B Centerline of u-joint located at the slip yoke end to centerline of the REAR (furthest u-joint) on the opposite end of driveshaft. Driveshaft must be collapsed.
C Face of flange to face of flange. Shaft must be collapsed. Some applications have a flange on one end only. Measure face of flange to centerline of REAR u-joint.
W Tube length only. Measure centerline of weld to centerline of opposite weld.
Type See pages V-VII

CORE RETURN POLICY

SLIP YOKE ASSEMBLY

Missing Slip Yoke - will be credited at 50% normal value.
Broken Ears on Slip Yoke - credited at 50% normal value.

CONSTANT VELOCITY JOINT ASSEMBLY

Missing Pieces - will be credited at 50% normal value.
Cracked H-Block - will be credited at 50% normal value.
Broken Flange - will be credited at 50% normal value.

SHAFT ASSEMBLY

Non-Rebuildable - will receive (0) zero credit.
Dented or Bent Tubing - will be credited at 50% normal value.
Completely Disassembled Cores - will be credited at 50% normal value.
Units Not in Original Box - will receive (0) zero credit.

WARRANTY

January 1, 2015

Pat's Driveline Specialty & Machine Ltd warrants to the original purchaser that it's manufactured and remanufactured components are free from defects in material and workmanship, when properly installed and maintained according to the original manufacturer's recommendations. This warranty shall be limited to the replacement or repair of any part or parts which may be proven defective under normal use and service, within 12 months from invoice date or 20,000 km, whichever ever is less, and 90 days from invoice date for on/ off highway vehicles, subject to manufacturer's stated warranty.

In no event shall Pat's Driveline Specialty & Machine Ltd be liable for consequential or special damages or for transportation, downtime, or other expenses, which may arise in connection with such components or parts. In the event that any such component or part proves to be defective in material or workmanship, the original purchaser's exclusive remedy shall be the replacement, repair or credit of such components or parts as deemed by Pat's Driveline Specialty & Machine Ltd. This warranty is expressly in lieu of all other warranties expressed or implied including the warranty of merchantability and fitness for any particular use or purpose, capacity and all other obligations or liabilities on Pat's Driveline Specialty & Machine Ltd's part.

Pat's Driveline Specialty & Machine Ltd neither assumes, nor authorizes any other person to assume for it, any other liability in connection with the sale of such components or parts. This warranty shall not apply to any driveshaft, components or any part thereof which has been subject to improper installation, maintenance, impact or accident damage, negligence, alteration, abuse, misuse or damage caused by failure of components other than that which Pat's Driveline Specialty & Machine Ltd supplied. Pat's Driveline Specialty & Machine Ltd makes no warranty whatsoever in respect to components or parts thereof that were not supplied by Pat's Driveline Specialty & Machine Ltd.

The term "original purchaser" shall be deemed to mean that person, firm or corporation for whom the driveshaft is originally manufactured or remanufactured.
